Dear Stan

Fire Damaged PVC-u Windows

As you are aware when we moved into our current office it had been vandalised including fire and smoke damage on the internal white PVC-u windows.

To have replaced 26 windows would have cost us £15,000 as these burn marks and stains were impossible to clean off.

We know of no other product other than your Coloured AST D45+ which will adhere to PVC-u in situ, we therefore approached you for help in this matter.

The material was painted on by our Painting Contractor to a satisfactory finish, speedily, easily and economically.

We are writing to let you know how pleased we are with the result, also the inconvenience and monies saved by not having to replace these windows.

We would be pleased to let any serious third party view these windows if this will assist you in marketing your excellent product.

Yours sincerely

D McEwan
