10 November 1998

Dear Piet

Just a note concerning your product AST D45. A number of the staff at Signman were discussing the quality of this treatment as used by our company on our outdoor PVC signage painted with G. V. Paints.

On completion of our signage, we roll a coat of D45 over the entire surface. The results could only be described as brilliant. Besides the gloss finish, the signs do not attract dust and dirt as in the case with some of our un-treated PVC signage. In fact, it has cost us a great deal of time, effort and money to clean up our untreated signage. In the past we used a polish which faded and dirtied our signage.

Even though the D45 treatment is fairly costly, it is still cheaper to use in the long term.

Our crews have stated that, even after a few years, your product has not only remained stable, but has become even harder, and does not stain or powder.

We look forward to continuing our business relationship based on the product which your supply.

Yours sincerely

JIMMY NICOLAU

Herewith a few photographs of signage treated with your product.
